

Mobileye's advanced driver assistance solution alerts drivers to imminent collisions with pedestrians, cars, trucks, motorcycles, and bicyclists.

Our partnership with Mobileye gives your fleet access to alerts for improved safety and to help avoid collisions.

MOBILEYE

Collision Avoidance Technology

Available as part of our comprehensive fleet safety toolkit

A Cost Effective Solution To Provide Visual And Audio Alerts Before An Incident Occurs

Studies show that as many as 94% of auto collisions are due to human error. As many as 80% of crashes involve some form of driver inattention within three seconds before the event, and as many as 60% of road accident fatalities are due to unintentional lane departure. Mobileye gives drivers vital additional seconds to best react and avoid or mitigate a collision.

TYPES OF WARNINGS

The Mobileye sensor views the road ahead and identifies and alerts drivers to:

- Vehicles
- Bicyclists
- Lane Marking Departure
- Unsafe Following Distance
- Motorcyclists
- Pedestrians

Some companies have achieved a 37% reduction in crash costs per mile using the Mobileye system.

Mobileye can be retrofit onto any road vehicles and requires minimal driver training. Avoid potential disasters and save operational costs with Mobileye.
